New Student

As a new student her at DMJX, there is a lot of information. Some of the information is from the IT department. You will find links to some of it here.

Before you can use the IT systems at DMJX, you must go through the two steps below:

1. Create your own password – you do this by visiting the self-service portal https://password.dmjx.dk. Here you can log in with MitID

2. When you have created your password, you must set up two-factor authentication (MFA) – before you start other things with your DMJX login. You can see how via this link: https://faq.dmjx.dk/index.php/dwkb/mfa-eng/

Once you have created a password and set up two-factor authentication, you can access your digital portals via the links below.
